EDUCATION

UNIVERSIDAD INTERNACIONAL DE LA RIOJA
DEVOPS MASTER

2024 - Present
Remote

TECHNISCHE UNIVERSITAT DRESDEN
CLOUD COMPUTING EXCHANGE STUDIES

2020 - 2021
Dresden, Germany

INSTITUTO TECNOLOGICO DE PUEBLA
INFORMATION AND COMMUNICATIONS TECHNOLOGY BACHELOR

2017 - 2021
Puebla, Mexico

EXPERIENCE

DEUTSCHE TELEKOM MMS

BARMER-APP | SENIOR ANDROID DEVELOPER

Dresden, Germany | 06/2021 – Present

As a native Kotlin developer on the Barmer app project, I took charge of the authentication process, ensuring secure, seamless, and efficient user login and registration flows. I implemented integration with third-party applications, leveraging coroutines and ReactiveX to manage complex asynchronous tasks with high performance and reliability.

To enhance scalability and maintainability, I spearheaded efforts in modularization, organizing the codebase into distinct, reusable modules. Using Koin for dependency injection, I ensured a lightweight and testable architecture. My work focused on delivering robust, maintainable, and user-focused solutions, contributing to the app's success in meeting modern Android standards.

DEUTSCHE TELEKOM GMBH - MDP | SOFTWARE ENGINEER

Dresden, Germany | 05/2021 – 10/2021

Java Spring application designed to manage contracts and mobile devices for employees. The portal utilized Hibernate, JSP, and ANT for efficient development and integration with the Oracle database.

T-PUNKT - PEPSIG | SOFTWARE ENGINEER

Dresden, Germany | 03/2021 – 04/2021

The project involved the development and support of an application that facilitated the signing of telephony T Point contracts using Anoto Digital Pens, utilizing JBoss, Wildfly, and the SOAP protocol, to record client signatures.

SKILLS

PROGRAMMING LANGUAGES
LIBRARIES/Frameworks
TOOLS / PLATFORMS

Kotlin, Java, Swift, Typescript
Android, iOS, React Native
Git, Gitlab, Github, Pytest, Appium

CERTIFICATIONS

- Site Reliability Engineering SRE Foundation - DevOps Institute.

HONORS & AWARDS

- Scholar | Seeds for the Future, China
